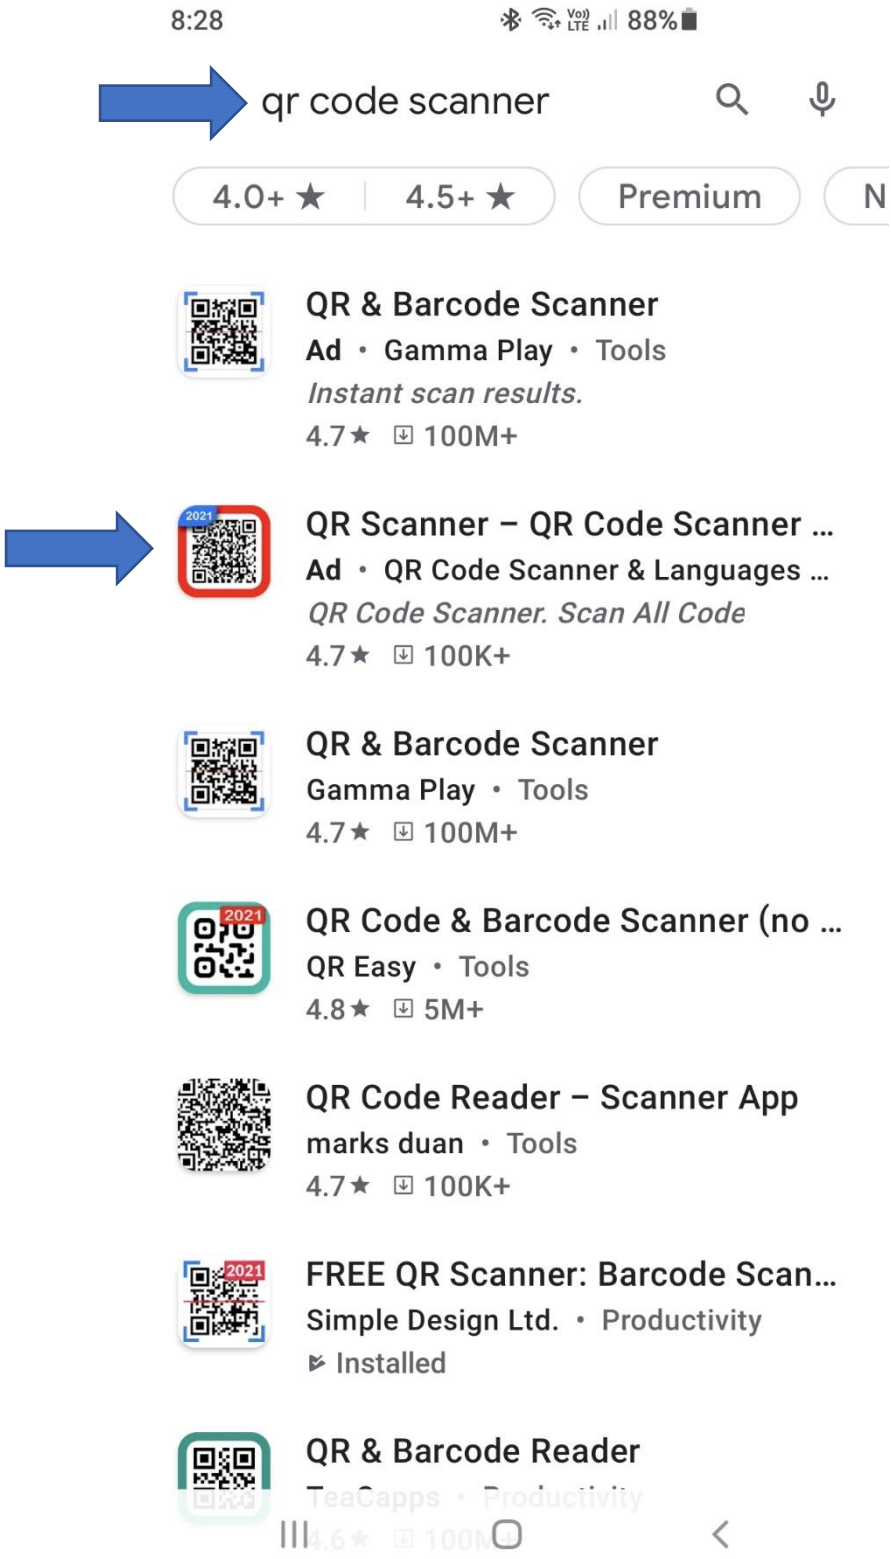
How to install the App on an Android phone or Tablet

Scan the barcode with your device camera

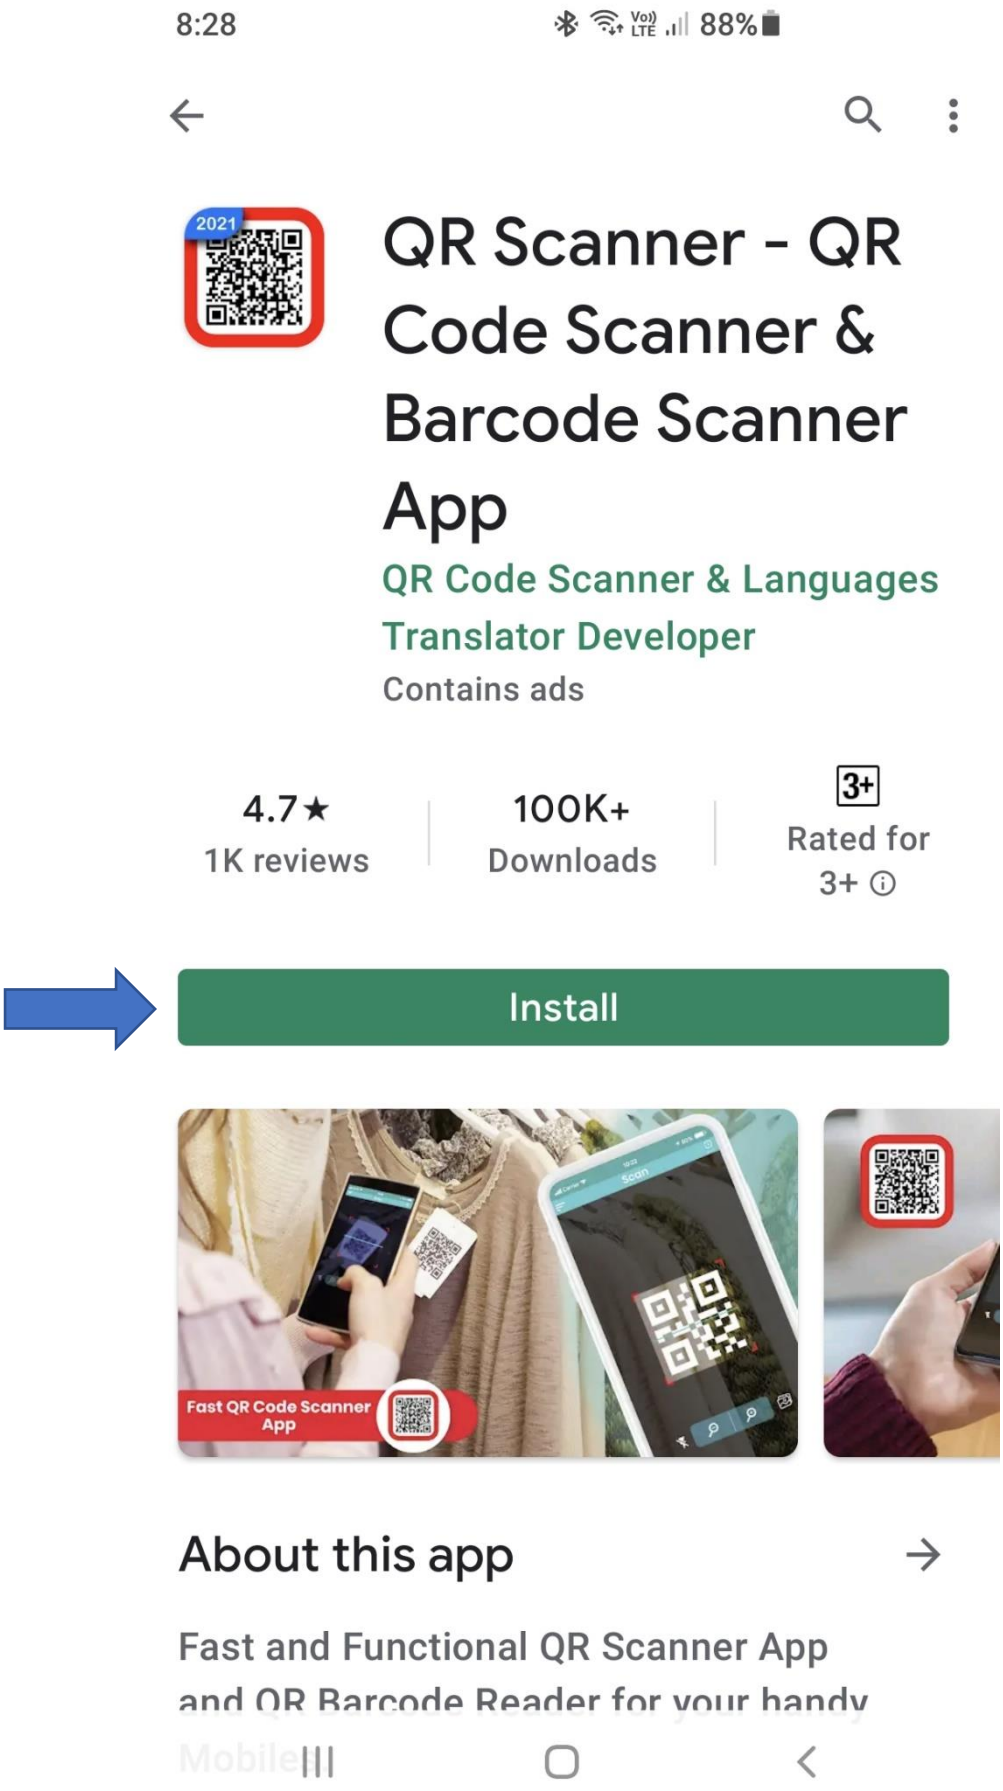
Some cameras will not scan QR Codes.

If this case you will need to download a QR Scanner app from the play store

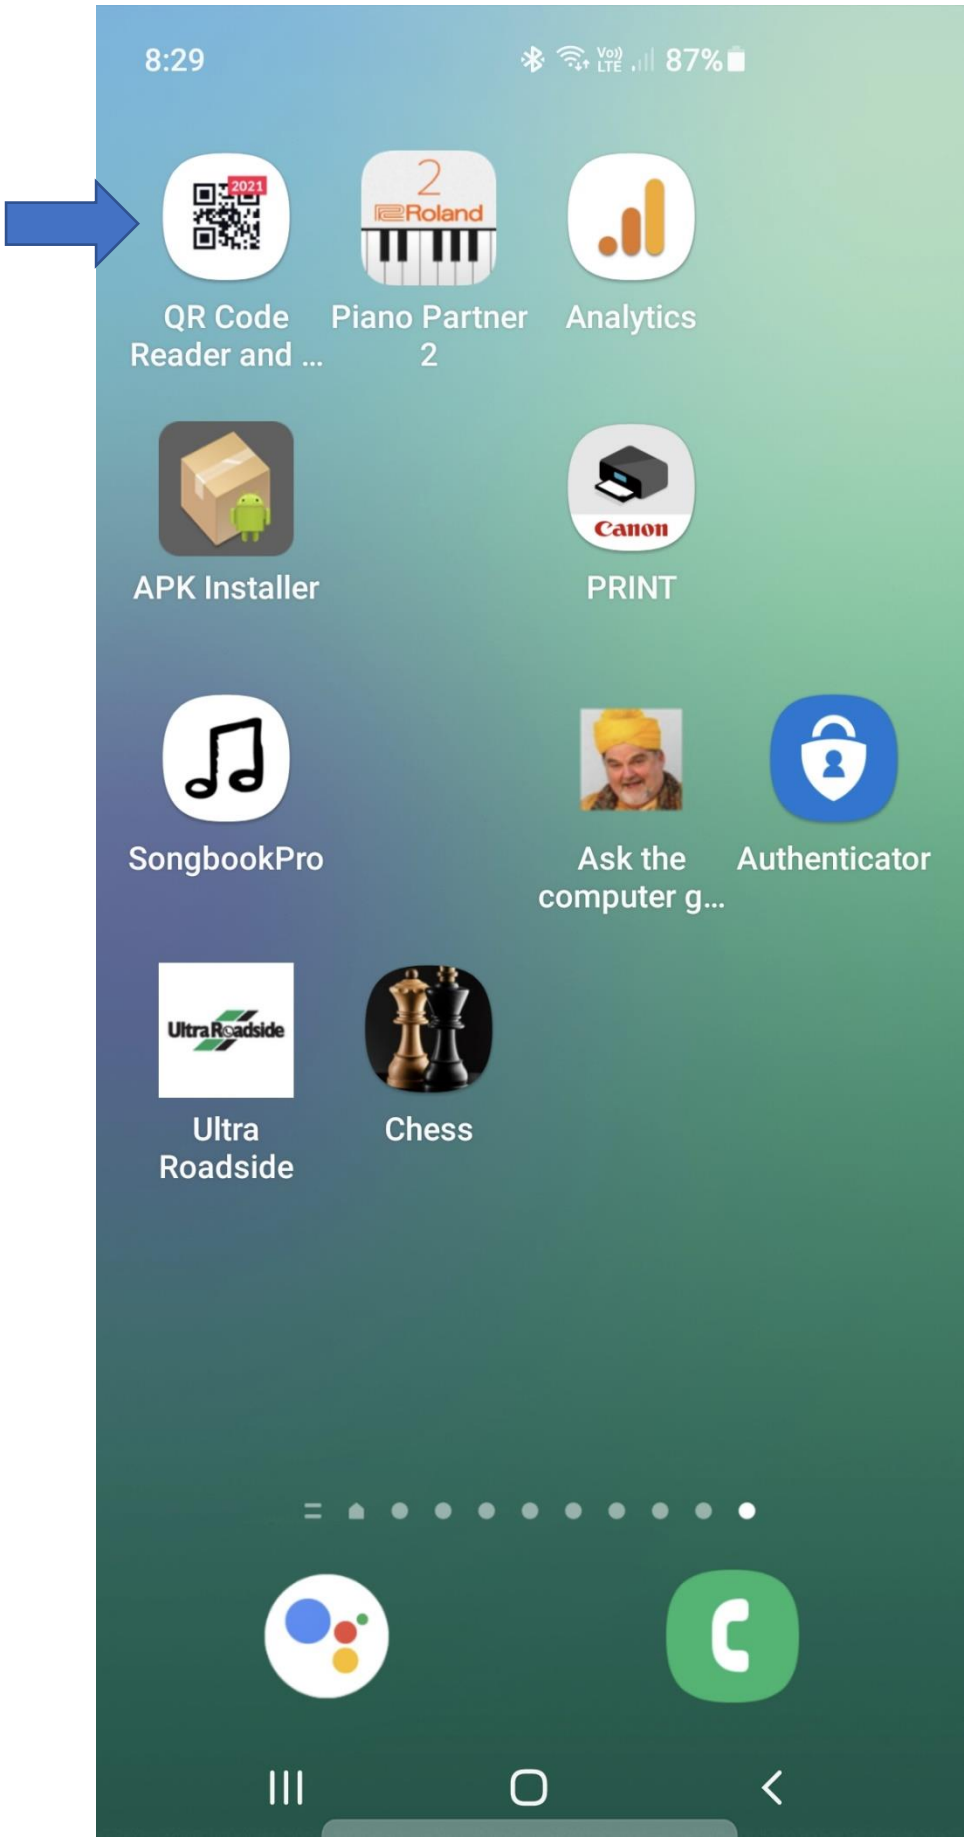
Click on the Google Play store App



Do a search for a QR Scanner. Any one of these will work.

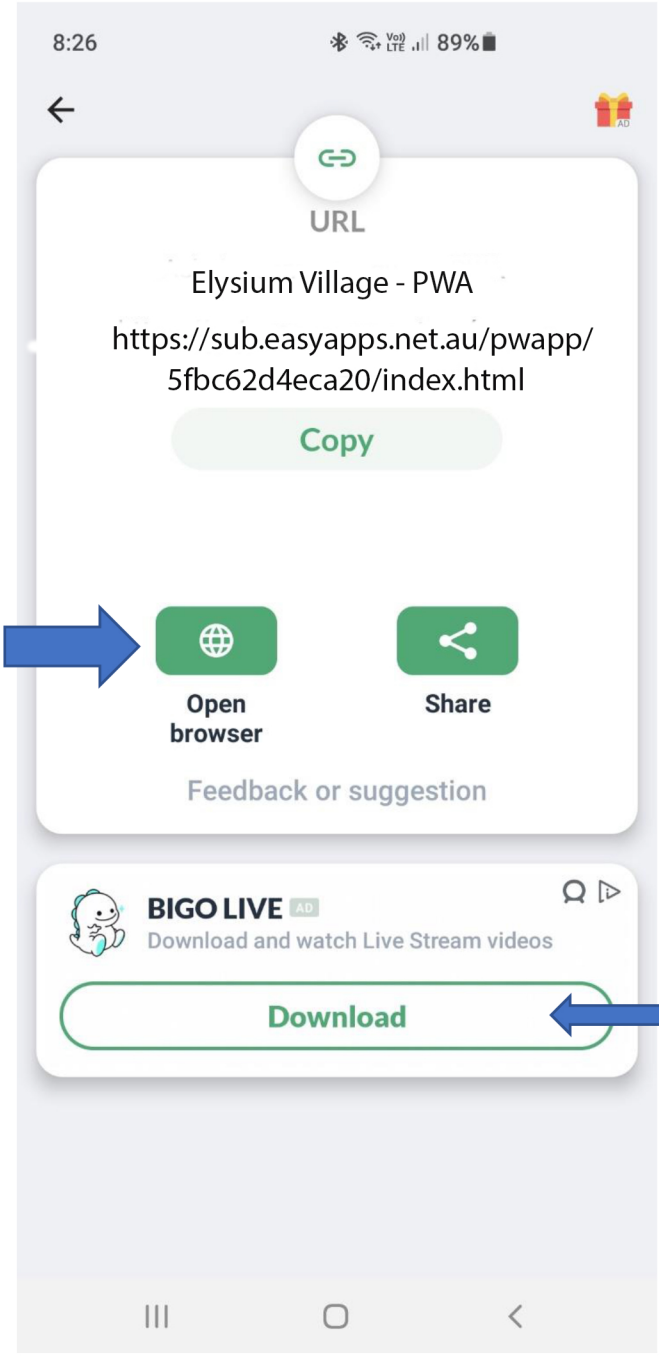


Install it the app on your device



Once installed, touch the App to open it

Now scan the QR Code



Ignore this. It's advertising

When this message appears Click on "open browser"

Allow https://ask .easyapps.net.au to send you notifications?

Deny | Allow

PDF Guides | Video Guides | About Us | Booking

Click “Allow”

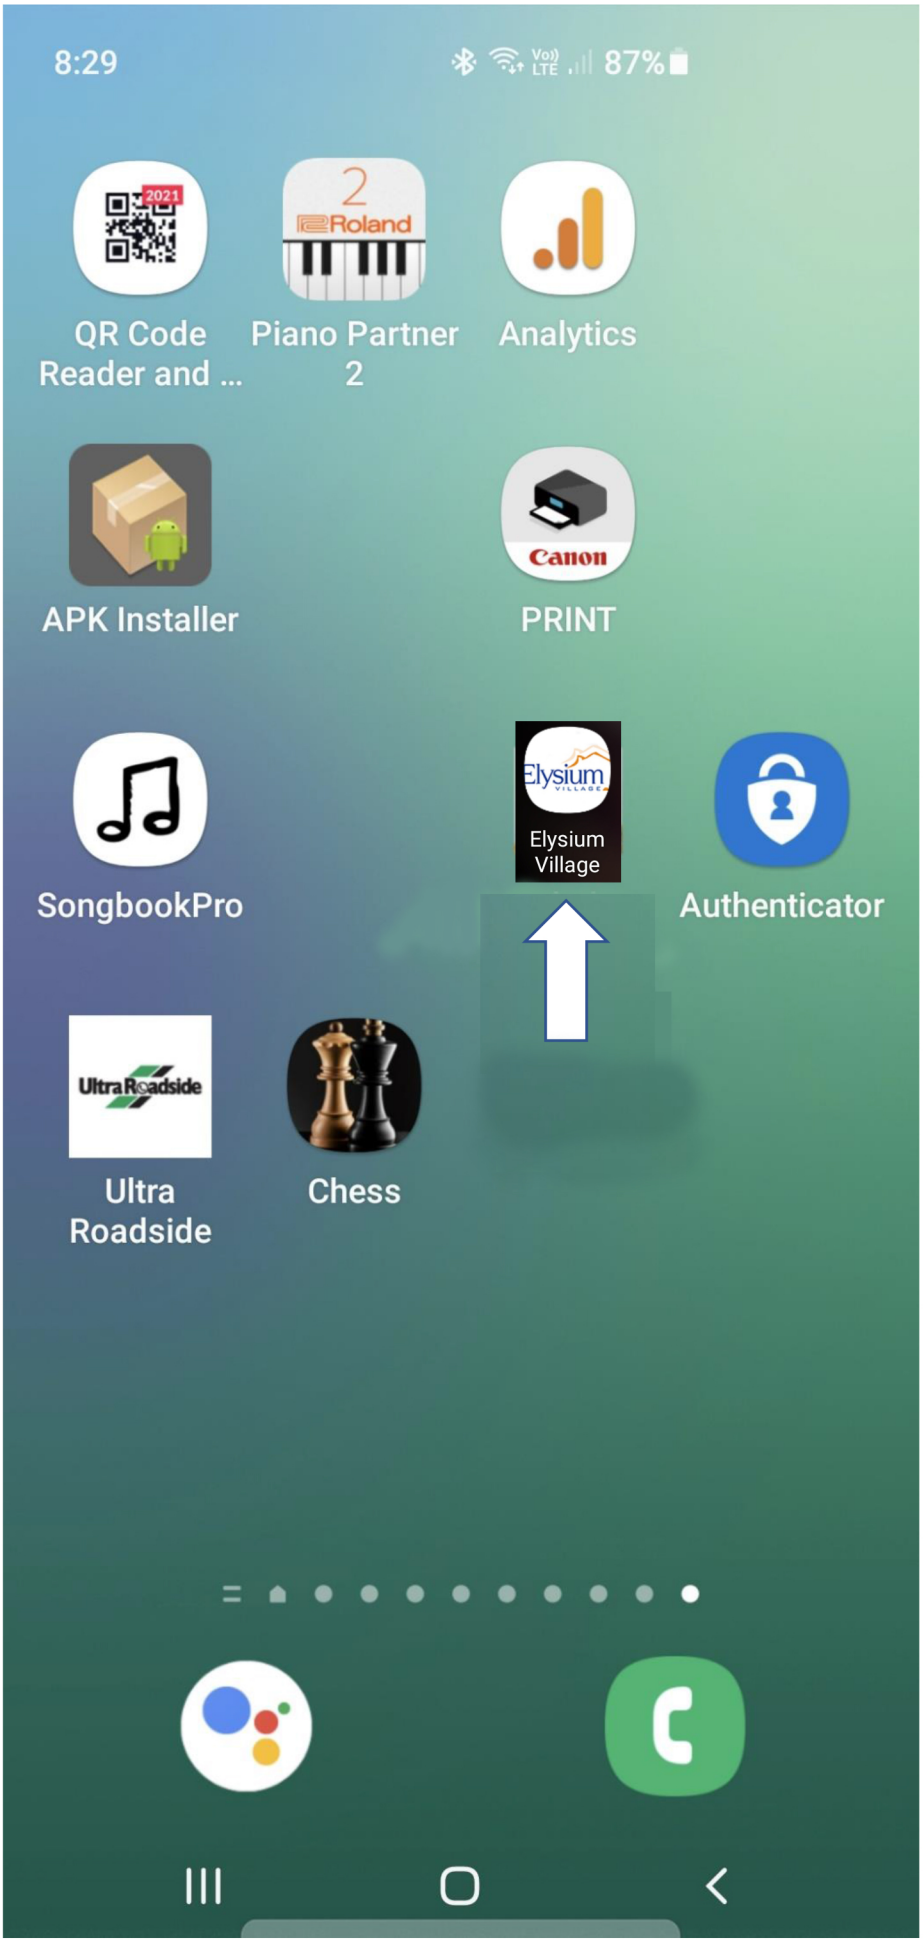
https://ask.easyapps.net .au wants to permanently store data on your device.

Block | Allow

PDF Guides | Video Guides | About Us | Booking

Click “Allow”

Click “Install”. This will create an icon on your device’s app screen



You can now start the app by clicking it's icon

The method of saving the app to your home screen may differ depending which version of Android you are running.

Here is an alternative method.
